

## Creating Our Flask Application And Loading Our Model By Using Load model Method

TEAM_ID	PNT2022TMID25018
PROJECT NAME	AI-Powered Nutrition Analyzer For Fitness Enthusiasts

Creating our flask application and loading our model by using the load\_model method

```
app = Flask(__name__,template_folder="templates") # initializing a flask app
# Loading the model
model=load_model('nutrition.h5')
print("Loaded model from disk")
```
